	Variable night charge 11pm-7am	0.1773c	(0.0103)c	0.1670c per kWh		

Notes

1. Network Waitaki determines the allocation of each site to a load group as described in the Use of System Agreement. The DLU group is available for a consumer's primary domestic resident only.
2. Variable charges are based on metering and reconciliation at the Grid Exit Point reduced by the declared network loss rate. The additional variable charges for sites in the "Domestic Low User" load group are based on site metering information reported by electricity retailers.
3. Distribution *and* Transmission charges are charged in respect of each site. Charges are invoiced to electricity retailers monthly in arrears. Fixed charges accrue on a daily basis at the rate of 1/365th of the annual amount. From time to time, the charges above may be subject to discounts.
4. Full terms and conditions detailed in the Use of System Agreement take precedence over the above summary. A standard Use of System Agreement is available at www.networkwaitaki.co.nz. This schedule is provided pursuant to Regulation 27 of the Electricity Information Disclosure Requirements 2004.
